## Ohjelmamalleja kokouksiin ja vierailuihin Models for meeting and visit programmes

1	Vierailuohjelmat / Visit programmes .....	2
2	Kokousohjelmat delegaatioille ja puolisoiden ohjelmat / Delegation and partner programmes .....	4
3	Median kokousohjelmat ja ennakkotiedot mediajärjestelyistä / Media programmes and preliminary information on media arrangements.....	25

Esimerkeiksi on koottu joidenkin Suomen puheenjohtajakauden aikaisten, valtioneuvoston kansliassa käännettyjen vierailujen ja kokousten ohjelmia. Niitä voi käyttää apumateriaalina muiden kokousten ja tapahtumien ohjelmien englanninkielisiä versioita laadittaessa. Kielellisissä valinnoissa on konsultoitu englantia syntyperäisesti puhuvaa lingvistiä.

These are examples of visit and meeting programmes produced in the Prime Minister's Office during Finland's EU Presidency. The programmes translated by the PMO's translators provide models for writing similar programmes in English. A native English-speaking language expert has been consulted on phraseological choices.

Venue for the dinner

Oulu City Hall was built around the assembly hall, which forms its core. The Seurahuone hotel and restaurant, which once stood on the site, burnt down in the great fire of Oulu in 1882. The town's only assembly hall was destroyed with them. When the new Seurahuone, a neo-Renaissance stone palace, was built soon afterwards, the assembly hall was central to the design.

Visit to Stora Enso's Oulu Mill

The Oulu Mill is one of the world's largest and most modern facilities manufacturing art- quality coated woodfree papers and boards. The integrated design and location of facility make it unique: almost all raw materials, including energy, are conveyed between the different plants by pipeline.

The main raw material, oxygen bleached pulp, is pumped to the paper mill from the site's own integrated pulp mill. Pigments are shipped regularly to one of the site's three harbours. Steam and electricity are generated as a by-product of the pulp mill, as well as by the power plant located in the area. The site's integrated harbour complex enables efficient product handling and brings the plant closer to its customers.
