- Employment rate remains too low
- Productivity developments lag behind
- Ageing hits Finland earlier and heavier than others

Sustainable Growth Programme for Finland

Old-age dependency

Employment
RRP priorities for economic, social and environmental sustainability

**Green transition** accelerates economic restructuring towards a carbon-neutral welfare society

**Digitalisation** and the data economy boost productivity and competitiveness and make services accessible to people

Well-functioning **labour markets and higher skill levels** are preconditions for sustainable growth

Reform of the **social and health care services** is necessary for improved access to services and cost-efficient service production in an ageing society
