Finland’s Strategy for the Baltic Sea Region

A healthy Baltic Sea with its vital marine life is a well-protected and sustainably used resource. The Baltic Sea Region actively develops its know-how and uses its resources as a forerunner of sustainable development. The Baltic Sea Region is stable and safe.

Finland works actively to make the Baltic Sea Region:

- A global leader in the bioeconomy and the circular economy
- Well-connected, innovative, competitive and at the cutting edge of utilising new technologies
- A producer of model solutions for safe and clean shipping, the maritime industry, and sustainable use of the marine environment.

**Vision**

- Good marine environmental status as a basis for sustainability
- Marine know-how and capacity
- Logistics and transport
- Connectivity in communications
- Maritime industries
- Blue bioeconomy
- Tourism
- Maritime spatial planning
- Nutrient recycling
- Well-managed material cycles
- Plastics and marine litter
- Hazardous substances
- Renewable energy
- Networks of SMEs and start-up accelerators
- Digitalisation
- Cooperation forums (CBSS, HELCOM, NCM)
- Cooperation with regional and local governments and civil society
- Civil security
- Efficient inter-agency cooperation
- Smart grids
- Security of supply
## Finland’s Strategy for the Baltic Sea Region

### VISION

A healthy Baltic Sea with its vital marine life is a well-protected and sustainably used resource. The Baltic Sea Region actively develops its know-how and uses its resources as a forerunner of sustainable development. The Baltic Sea Region is stable and safe.

**FINLAND WORKS ACTIVELY TO MAKE THE BALTIC SEA REGION**

- A global leader in the bioeconomy and the circular economy
- Well-connected, innovative, competitive and at the cutting edge of utilising new technologies
- A producer of model solutions for safe and clean shipping, the maritime industry, and sustainable use of the marine environment.
